

ABSTRACT

A patch formulation for external use where a basic drug,
an organic acid and an organic acid salt are combined as
5 essential components is disclosed. The basic drug is
preferably in the form of its acid addition salt. The organic
acid is preferably a carboxylic acid having carbon atoms of
2 to 7, and more preferably at least one acid selected from
the group consisting of acetic, lactic, tartaric, citric,
10 malic, benzoic and salicylic acids. The organic acid salt
is preferably a metal salt of a carboxylic acid, and more
preferably sodium acetate.
